

Data Rack

Part No: MTKDIN02-GY

Description	DIN mount for TS series Outlets
Suitable Applications	Designed to accept the Garland TS series of keystone outlets. Suitable for both screened and unscreened outlets

- Fits standard 35mm DIN rails
- Modular design
- Removable side covers
- Internal grounding spring

By selecting the appropriate outlet, the DIN mount can be configured for Cat5E, Cat6 or Cat6A performance. An internal grounding spring allows for both UTP and screened outlets to be used. Available in an industrial grey colour, these DIN mounts can be easily fitted and removed from a standard 35mm DIN rail.

The removable side covers allow the mounts to be fitted side-by-side on a DIN rail thus forming a DIN rail patch panel. The front of the DIN mount opens to allow easy access for loading the mount and servicing. An integrated dust cover helps to keep dust, dirt, and oil from soiling the RJ45 contacts.
